

TRADING

The **Sales Management** and the **Purchasing Management** flexibility allow the automatic acquisition of the data from one managing stage to another.

In this way it is possible to issue Delivery Notes and immediate invoices by just recalling the to-be-fulfilled orders, or to automatically invoice the totally or partially issued Delivery Notes.

This procedure allows obtaining, rather than only the simple documents management, every recorded or issued document's history; it is possible, in fact, starting from a document, to visualize the documents that have been generated by the recording or the issue of the first one.

- Customers' offers
- Customers' orders and suppliers' orders
- Delivery Notes
- Sales and purchase invoices
